

# PROFIBUS-DP®

## MULTI-BUS Hook-up diagram

### PROFIBUS connection

**M12 connector  
female chassis part  
B-coded**

\*) signals are for termination purpose only.

### RS232 connection

**RS232 COM-port  
9 pin D-Sub  
connector chassis  
part male**

**T-adapter  
cable 7.03.444**

### Types

(mini)CORI-FLOW

### Model key explanation

P	PROFIBUS-DP	Normally Closed (NC)	
Q	PROFIBUS-DP	Normally Open (NO)	
A	Output / setpoint	0...5Vdc	
B	Output / setpoint	0...10Vdc	
F	Output	0...20mA dc sourcing	
G	Setpoint	0...20mA dc sinking	
	Output	4...20mA dc sourcing	
Z	Setpoint	4...20mA dc sinking	
	Output / setpoint	Specified	
D	+15Vdc ... 24Vdc power supply		

M12 connector  
female chassis part  
B-coded

8 DIN connector  
chassis part  
male

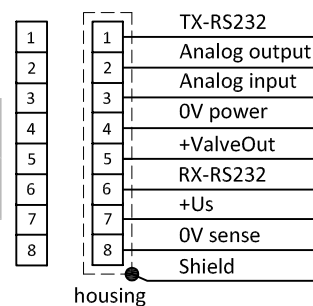

M12 connector  
female chassis part  
B-coded

8 DIN connector  
chassis part  
male

8 DIN connector  
chassis part  
male

M12 connector  
female chassis part  
B-coded

**8 DIN  
connector  
chassis part  
male**

**8 DIN  
connector  
cable part  
female**

Note:  
Do not connect an external valve to instruments, set as MFM.

Note:  
0V power (pin 4) and 0V sense (pin 8) should be separately connected to the 0V terminal at the power supply.

**Analog operated  
0...5 or 0...10Vdc**

Note:  
When using a field bus or RS232, it is not possible to operate the instrument by using the setpoint signal of the analog 8 DIN connector without changing the value of parameter "control mode". See doc.nr. 9.17.023 for more details

Note:  
In analog mode with 'mA signals' Pin 8 (0V sense) does not need to be connected. The instrument's operation will not be effected in case Pin 8 is already hooked-up

**Analog operated  
0...20 or 4...20mA dc**
